

Concept Statement & Reference Images

For the final project I plan to model a skeleton playing a trumpet. This model will be placed in an auditorium. I feel this will be a good choice as a skeleton and a trumpet both have many different parts, which will allow me to demonstrate my ability to model complex shapes. I also think that this will be interesting to do because I will be able to choose exactly how much detail I want to include, as well as add some of my own styling to the project.
